SUMMARY

We have received your application dated August 10, 2010, requesting a new source material license and have identified the following problem:

Page 4, Item 12. of your application states that a fee was remitted in the amount of $10,100 and the program code of "11300" is referenced, as well as contacts you and your company had with me and with Brenda Brown, in NRC's Fees Branch in our headquarter's office.

However, no fee was received with your application.

We advised you of this matter in several subsequent telephone contacts, most recently by a letter sent by Ms. Brown on September 2, 2010.

As of today, September 22, 2010, almost three weeks later, we have not received either the new license fee or any contact from you or your company concerning the disposition of your new license application.

In accordance with my supervisor's instructions, I contacted you today by telephone. You stated that you had just received the letter requesting the fee last week and you were sending the check sometime this week. You said that it has been unclear as to whether the Army was going to be providing your company with the tank to work on, as the Army has said that it would do so sometimes and at other times, the Army has said that it would not do so. Therefore, you delayed sending in the fee and our office was not notified of the delay or the reasons for the delay. I reminded you that the new license application should not have been sent it without the new license fee.

When I called this afternoon, you said that it appeared the Army would be providing the tank. I advised you that about 5 – 6 weeks, or almost half of our allotted initial review time of 90 days maximum, was already past. As it could easily take another 7 – 14 days or more for you to send in the fee and as my supervisor had directed me to contact you and

explain that we were voiding your new license application today, I advised you that we are doing so today.

I explained that "void" means we are taking it out of our active database until it is re-activated in the future. You can re-activate the application process and reset the calendar of review time by submitting the appropriate fee. You may reference this phone contact with me today to do that and you do not have to submit the same new license application all over again. I gave you the control number assigned to this action, my name and my direct phone number. You implicitly agreed to our voiding the application at this time.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this record will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

ACTION REQUIRED

If you choose to submit the required fee, please reference control number 573344 to facilitate proper handling. Upon receipt of your response we will reactivate placement of your request in our database and resume our review. Address your written response to my attention at the above address.

PLEASE DIRECT ANY QUESTIONS YOU MAY HAVE TO ME AT 630-829-9841.
