Subject: Acceptance Review Results for LAR to revise TS 3.7.4 "Atmospheric Dump Valves"
Attachments: SUPPLEMENTAL INFORMATION REQUIRED.pdf

Rusty,

As we discussed, the NRC staff has found the subject license amendment request unacceptable with opportunity to supplement. Enclosed is the draft of the information insufficiencies. We had tentatively set up a conference call to clarify these for 1 pm EDT (10 am MST). Please confirm that this time will work for you. Following this conference call, a formal letter will be issued.

Please call if you have any questions or would like to reschedule the conference call.

Thank you,

Lauren
