Subject: Lake Granbury

Dear Sir:

After receiving the blown up advertisement for the Luminant company about the Comanche Nuclear power plant and it's proposed expansion, I knew I had to write you. In the ad it went on and on about how they had helped to pay for the construction of Lake Granbury and through all of the hoopla indicated that they practically owned the lake.There was no mention about the water they plan to be taking from the lake when they build two more plants. Even when they return (maybe 30%) anyone can tell that eventually the lake would be dried up. If this happens, Granbury would become a ghost town for sure and the Nuclear facility would also have to find another source. Somebody has to protect us.
Please do what you can to save our beloved lake and make them find another solution for finding a source of water for coolant.

Thank you.

Susan Petry
