and Safeguards
Office of Nuclear Material Safety
and Safeguards

SUBJECT: SEPTEMBER 28, 2010, CALL WITH INTERNATIONAL ISOTOPES INC. TO DISCUSS THE FORMAT OF RESPONSES TO THE REQUESTS FOR ADDITIONAL INFORMATION (TAC NO. L32739)

The U.S. Nuclear Regulatory Commission (NRC or staff) held a conference call with International Isotopes Inc. (INIS) and their contractor on September 28, 2010. The purpose of the call was to discuss the format of the applicant's responses to the NRC's requests for additional information (RAIs). Public versions of the RAIs are available via the Agencywide Documents Access and Management System at ML102390212 and ML102390292.

The INIS responses will contain written discussions to address the RAI. The responses will also include, wherever possible, proposed text revisions to the licensing documents. However, INIS does not plan to submit revisions to the license application until all the RAIs have been resolved, near the end of the application review process.

The NRC agreed with the applicant's proposed format, and encouraged them to clearly describe any proposed changes to the licensing documents. The draft responses may be submitted in sections, organized by review area.

INIS plans to request a formal extension to the November 11, 2010, due date for the formal RAI responses, once they reevaluate the schedule based on information from the call.
