**APPLICANT POWERTECH (USA) URANIUM CORPORATION'S MONTHLY
UPDATE TO INITIAL MANDATORY DISCLOSURES**

Pursuant to 10 C.F.R. § 2.336(a) & (b) and the September 23, 2010, oral determination of the Atomic Safety and Licensing Board (Licensing Board), Powertech (USA) Uranium Corporation (Powertech) hereby submits its October, 2010 monthly update to its mandatory disclosures for this proceeding:

1. Potential Testifying Witnesses

On September 13, 2010 and pursuant to 10 C.F.R. § 2.336(a)(1), Powertech submitted its initial mandatory disclosures, including a list of organizations (e.g., consultants, etc.) from which testimony may be solicited during the hearing process. Powertech expressly noted in its submission that

“its proposed potential witness list includes the name of one person from each company or organization that potentially may be called upon to offer expert witness testimony in this proceeding. In the future, the identified person may designate a member of his/her company or organization to offer expert testimony based on his/her specific area of expertise.”

See Applicant Powertech (USA) Uranium Corporation's Initial Mandatory Disclosures (September 13, 2010).

At the current time, Powertech has no additions to the previously disclosed proposed witness list. In the event that additional witness are identified, either from the previously noted organizations or newly identified organizations, Powertech will provide those as expeditiously as possible on a monthly basis.

2. Documents and Data Collections

Powertech's September 13, 2010 initial mandatory disclosure submission also included a detailed breakdown of documents that potentially will be relied upon during the hearing process. Since that submission, Powertech has identified an additional document to be added to the previously submitted list and the amendment to that list is attached to this filing. In addition, Powertech has identified an additional portion of a document to be labeled as privileged or confidential. Powertech's response to NRC Staff's request for additional information (RAI) on its Environmental Report dated August 11, 2010, which can be found at ML102380530, contains information that Powertech currently intend to rely upon during the hearing process; but, Powertech's answer to ER RAI CH-1 is considered to be privileged and confidential pursuant to 10 C.F.R. § 2.390(a)(4) and should be treated as such. The remainder of Powertech's response to ER RAIs is currently classified as a public, non-privileged document. Other than the document discussed above, Powertech has no further "tangible things" to submit at this time.

Respectfully submitted,

/Signed (electronically) by/ Christopher S. Pugsley
