Subject: FW: Assistance in obtaining information for STP 3&4

Al,

As we spoke this morning, here's the STP request for documents.

Thanks,

Rocky

Fred,

Can you assist me with this?

Terri

Ms. Terri Duncan,

Attached is the tech manual.

Request through the NRR PM or NRO PM cc'ing me for access to the other two documents.

You will need to transfer in a L (minimum) clearance to RC ADMIN personnel security for the SNSI version of the delay manual.

Thank you,

-Al

Hi Al,

I've heard your name many times from my friends out at the Nevada Test Site (specifically Steve Scott). I sat across the table from you in yesterday's meeting at the NEI. I'm relatively new to the NRC and energy industry as my background is in the DOE for ten years, specifically working with new technology and standing up the Technology Deployment Center (TDIC) at the NTS.

I need some help finding information and understanding how to obtain it. I'm looking for the Sandia Nuclear Power Plant Security Assessment Tech Manual and the NRC Access Delay tech transfer manuals –Vol. I is UCNI and Vol. II is SNSI (barrier handbooks). We definitely have a need to know and I can make this request through the appropriate channels once I understand the process. Can you assist me with this or lead me to the proper source?

I look forward to working with you.

Thanks,

Terri Duncan
