Point Beach Nuclear Plant, Units 1 and 2
Dockets 50-266 and 50-301
Renewed License Nos. DPR-24 and DPR-27

Point Beach Nuclear Plant
Licensee Qualification for Performing Safety Analysis
Generic Letter 83-11, Supplement 1

Reference: (1) WCAP-11596-P-A, (Proprietary), "Qualification of the PHOENIX-P/ANC Nuclear Design System for Pressurized Water Reactor Cores," June 1988

NextEra Energy Resources, LLC (NextEra) is integrating and consolidating nuclear fuel activities of St. Lucie Units 1 and 2, Turkey Point Units 3 and 4, and Seabrook, with Point Beach Nuclear Plant (PBNP), Units 1 and 2. The NextEra Corporate Fuels group will perform the reload physics analyses for PBNP that were previously performed by Westinghouse Electric Company.

NextEra uses the NRC generically approved Westinghouse PHOENIX-P/ANC Nuclear Design System (APA) methodology (Reference 1) for St. Lucie Units 1 and 2, Turkey Point Units 3 and 4, and Seabrook. The Westinghouse APA methodology for nuclear design is also applicable to PBNP. Section 3.2 of the PBNP Final Safety Analysis Report references this methodology.

NextEra implemented the guidelines in accordance with the requirements of Generic Letter (GL) 83-11, Supplement 1. The documentation of training, qualification and appropriate benchmark calculations is available for NRC review.
