Mail Control 573609 License No(s) 47-25539-01 Docket No(s) 030-35483  
or Report No(s).

Name of Licensee: Terradon Corporation

Name of Participant(s): J. Bruce Frame

Telephone No. 304-545-0409

Subject: License renewal application

(NOTE: This will be used as the Documents Title in ADAMS)

The licensee's renewal application dated September 24, 2010, referenced NUREG 1556, Vol. 1 (not Revision 1). In addition, the licensee did not provide the number of gauges that they need to possess/use. I called the RSO to discuss these deficiencies. The RSO asked me how to address these deficiencies because their license expired at the end of September, 2010.

I told him that either he can use Appendix B of NUREG 1556, Vol 1, Rev.1 or he can have his manager write a letter confirming that the omission of Rev 1 in the references was inadvertent. He asked me where he can get Appendix B from internet. I guided him through the process and helped him complete information on NRC Form 313 and fill out Appendix B. I told him that the form 313 must be signed by a senior manager and appendix B must include the number of gauges of each type that they want to include in the license. The RSO was concerned that if he sends the replacement application with today's date, their license may not be renewed because it expired on September 30<sup>th</sup>. I assured him that NRC knows that you submitted original application before expiration and we have sent an acknowledgment letter also, therefore it will not create any problem.

He promised to fax the application immediately.

**Action Required:** Renew the license if revised application ok.
