Re: Additional Information for Expedited Request for Prior Written Consent of  
"Suspected" Change of Control  
NRC License #21-32342-01  
Control #573389

Dear Mr. Reichold:

Please accept this additional information you requested with respect to the U.S. Nuclear Regulatory Commission's ("NRC") consent to a "suspected" change of control of Grand View Health System, Inc. ("GVHS"), a nuclear material licensee.

1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.

The corporate structure of GVHS will change from a directorship nonprofit corporation, which legally has no "owners" but is controlled by a board or directors, to a nonprofit membership corporation. As a membership corporation, GVHS will be renamed "Aspirus Grand View" and will have two corporate members (substantially equivalent to shareholders in a non-profit context). The new members will be a newly formed entity named Gogebic Range Health, a Michigan nonprofit corporation, which will own 30% and Aspirus, Inc., a Wisconsin nonprofit corporation, which will own 70% of Aspirus Grand View. Aspirus Grand View will then carry on and operate as a critical access hospital in the same manner as GVHS did before the corporate reorganization.

Please contact Carol Goffnett at (906) 932-5330 if more information is needed.

2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.

There will not be any changes in personnel or duties that relate to the licensed program. There are no personnel changes contemplated.

3. Describe any changes in organization, location, facilities, equipment or procedures that relate to the licensed program.

There will be no changes in organization, location, facilities, equipment or procedures that relate to the licensed program in connection with this transaction. The organization, location, facilities, equipment, and procedures that relate to the licensed program will remain intact after the transaction.

4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.

The annual review of GVHS's radiation safety program was conducted in March of 2010. The results of that review are attached in full. At the current time, a quarterly audit was also conducted in June and another is expected to be conducted in October by Shan Marlette, M.S., a Consultant Physicist. This status will not change at the time that control is to be transferred.

5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

GVHS has not decommissioned any facility with respect to its nuclear medicine program. Therefore, there are no records concerning the safe and effective decommissioning to transfer.

6. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

See Attachment A for Aspirus, Inc. and Gogebic Range Health confirmation that the transferees will abide by all constraints, conditions, requirements and commitments of the transferor.

7. Provide documentation that the transferor and transferee agree to the change in ownership or control of the licensed material and activity, and the conditions of

transfer; and the transferee is made aware of all open inspection items and its responsibility for possible resulting enforcement actions.

See Attachment A for Aspirus Inc. and Gogebic Range Health agreement to the change in control of the licensed material and activity and the conditions of the transferee. Please accept my signature below as GVHS's certification that Aspirus, Inc. and Gogebic Range Health are aware of all open inspection items and their responsibility for possible resulting enforcement actions.

If you have any questions or need further information regarding the specifics of GVHS's nuclear medicine program, please feel free to contact Rae Kaare at (906) 932-5330 ext. 6086.

Sincerely,
