I understand that for the information in this paper to be given external distribution, approvals by both WSRC and, as appropriate, DOE-SR are required. Distribution (verbally or published) must be in accordance with policies set forth in WSRC management requirements and procedures (MRP 3.25) and in DOE-SR orders, and the content of the external distribution must be limited to that actually approved.

Introduction and Summary

A compilation of historical data related to the receipt of fresh separation process wastes into various underground waste storage tanks was done by A. T. Crumm (co-op student) and described in a departmental report¹. This report serves as the formal documentation of this previously completed work.

Fresh waste receipt information was taken from Works Technical² and Waste Management³ monthly reports for the November 1954 through April 1993 time period, with the exception of a two month period during which it was necessary to estimate the receipt data. The data contained in this report will be combined with waste composition and additional waste transfer information to construct predictive models for waste tank composition.

Discussion

Appendix A contains a hard copy of a spreadsheet which contains information on the receipt of fresh separation process wastes into the underground waste storage tanks. In the spreadsheet, the first column is the Report Date, and is a direct reference to the monthly report from which the data were extracted (e.g. Mar-67 data are from the March 1967 Works Technical Monthly Report; DPSP-67-1-3). The data recorded in subsequent columns include: Report Date, Time Period, Campaign, Type Waste, Gallons Sent from Canyon, Gallons Received in Tank Farm, Receipt Tank, and Amount Received. Time Period is the actual dates covered by the specific monthly report. Campaign is the canyon extraction process (e.g. PUREX) used during the reporting period. Type Waste categorizes the waste from each canyon (F or H) as High Heat (HHW) or Low Heat (LHW) Waste. Gallons Sent from Canyon is the total volume of waste sent to the tank farm as determined from the canyon waste neutralization tank instrumentation, whereas Gallons Received in Tank Farm is the total volume of waste received in the tank farm as calculated from tank level changes. Receipt Tank identifies the fresh waste receipt tank, and Amount Received is the volume of waste received by a specific receipt tank, thus allowing for the presentation of waste volumes to more than one receipt tank during the month (e.g. F-Area HHW was received in tank 3 and tank 5 during January 1960).

There were some periods during which all of the pertinent data was not included in the monthly reports. During the periods 12/82-7/84, 12/84-1/85, and 8/85-4/93 no data on Gallons Sent from Canyon was included in the monthly reports. This column was left blank in the spreadsheet for these time periods. During the two month period 4/84-5/84, no fresh waste receipt data was given in the monthly reports. The Receipt Tank was estimated by assuming that the fresh waste receipt tanks were the same as those shown in the monthly reports immediately before and after this two month period (all four receipt tanks were the same before and after this period, indicating that the tanks did not change). The data for Gallons Received in Tank Farm was estimated using data from the months preceding and following the two month period (3/84 and 6/84). Volume per production rate factors (gal./MTU for F-Canyon and gal./kg Al for H-Canyon) were calculated for each of the four waste streams (F-HHW, F-LHW, H-HHW, and H-LHW) for both months (before and after the missing data). The average (before and after) volume per production rate factor for each stream was multiplied by the production rate for the month to estimate the missing volumes. All of the production rate values were taken from a published compilation of historical data⁴.

Changes in Revision 1

The following corrections have been included in Revision 1. All other data is identical to that which was published in Revision 0

<u>Page #</u>	<u>Row Description</u>	<u>Change</u>
A-3	Sep-57, PUREX, F-HHW	Receipt tank changed from 14 to 3
A-6	Oct-60, PUREX, F-HHW	Gallons Rec'd in Tank Farm from 32000 to 57200
A-7	Jan-62, HM, H-HHW	Amount Received from 17000 to 18180
A-7	Mar-62, PUREX, F-HHW	Amount Received from 44590 to 84750
A-34	Jul-88, PUREX, F-HHW	Receipt Tank from 39 to 34
A-34	Jul-88, PUREX, F-LHW	Receipt Tank from 43 to 26
A-34	Jul-88, HM, H-HHW	Receipt Tank from 34 to 39
A-34	Jul-88, HM, H-LHW	Receipt Tank from 26 to 43
A-34	Dec-88, HM, H-HHW	Added entire row
