Don,

We will still have the conference call next week. Stephen should be available.

Regards,

MICHAEL H. WILLINGHAM, ENV PROJECT MANAGER

Environmental Projects Branch 1
Division of Site and Environmental Reviews
Office of New Reactors
301-415-3924

Subject: 2010-10-06 CPNPP COLA Project

In lieu of the weekly COLA conference call, here is a list of some activities we need to follow-up on:

- Chapter 2 – Luminant understands that the NRC may bring in additional resources to support the safety hydrology review. We have had discussions about a site visit to provide orientation and familiarization for the new personnel. We had discussed October 19 but never received confirmation as to a date. Luminant would like to support the site visit but would like to better understand the scope (surface water, ground water or water use?) so that we can have the right personnel available. We also need a new proposed date.
- Chapter 3 – Luminant has requested a clarifying conference call for RAI 180 (03.02.02-5) re codes and standards for systems and components. (See my email request dated 10/1/2010 – attached.)
- Chapter 14 – Luminant has requested a conference call to discuss RAI 173 re the requirements for license conditions to track certain activities such as test specifications, procedures and schedules.
- Chapter 16 – The NRC and Luminant have discussed a potential public meeting to discuss risk informed technical specifications and the development of the PRA to support them. The first week of November seems like the right time frame but we need to agree upon a date soon.
- Chapter 17 – Luminant is considering a conference to discuss the NRC's expectations regarding the open QA Inspection NOV. I will contact Steve next week to discuss the potential for such a call.

I assume we will have a CPNPP COLA conference call next Wednesday (10/13/2010) at the normal time on the normal bridge line.

Thanks,

Donald R. Woodlan

Manager, Nuclear Regulatory Affairs
