

## 1.4 Identification of Agents and Contractors

The information in this section of the reference ABWR DCD is incorporated by reference, with the following site-specific supplement.

STP Nuclear Operating Company (STPNOC) is the operator of STP 3 & 4 and maintains control and oversight of design and construction.

The design and construction of STP 3 & 4 is the responsibility of Toshiba Power Systems Company acting in conjunction with subcontractors including Westinghouse and Sargent & Lundy. Toshiba will have overall responsibility for design and configuration control. Sargent & Lundy will provide architect/engineer services. Westinghouse will provide engineering services, including design of instrumentation and controls.

### 1.4.4.4 Identification of Agents and Contractors – STP 3 & 4

#### 1.4.4.4.1 ~~1.4.1~~ STP Nuclear Operating Company

STPNOC is the operator and license holder of STP 1 & 2 and will be the operator and license holder for STP 3 & 4.

#### 1.4.4.4.1.1 ~~1.4.2~~ Toshiba Power Systems Company

Toshiba Power Systems Company is responsible for the Engineering, Procurement, and Construction (EPC) of STP Units 3 & 4. In this capacity Toshiba has overall project management responsibility for the design and construction of the facility, including support of the Combined License Application (COLA), in conjunction with the subcontractors described below.

Toshiba has extensive experience in the design, construction, and commissioning of the Advanced Boiling Water Reactor (ABWR) worldwide, having participated in the development of the common engineering documents, design of the ABWR systems, and construction of three ABWRs in Japan. The first ABWR, Kashiwazaki-Kariwa Unit No. 6, commenced commercial operation in 1996, followed by Unit No.7 in 1997, and Hamaoka Unit No. 5 in January 2005.

#### 1.4.4.4.2 ~~1.4.2.1~~ Westinghouse Electric Corporation

Westinghouse Electric Corporation (WEC) has significant experience in the design, construction, inspection and maintenance of domestic and international nuclear power plants.

#### 1.4.4.4.3 ~~1.4.3~~ Sargent & Lundy

Sargent & Lundy provides engineering services for STP 3 & 4, specifically the design of the Nuclear Island, including the Reactor Building, Control Building, Radwaste Building and Ultimate Heat Sink.

For more than 100 years Sargent & Lundy has provided comprehensive consulting, engineering, design, and analysis for electric power generation and power delivery projects worldwide. Sargent & Lundy has a large, highly experienced staff solely dedicated to the energy business.

#### 1.4.4.4.4 ~~1.4.4~~ Other Contractors

Several specialized consultants assisted in developing the COLA.

##### 1.4.4.4.4.1 ~~1.4.4.1~~ Tetra Tech NUS, Inc.

Tetra Tech NUS, Inc. performed data collection and analysis, and prepared sections of the Final Safety Analysis Report (FSAR) and Environmental Report (ER), including socioeconomics/demographics, ecology and ecological impacts of construction and operation, land and water use impacts of construction and operation, transmission system impacts of construction and operation, radiological impacts of operation, uranium fuel cycle and transportation of radioactive materials impacts, and environmental impacts of postulated accidents.

Tetra Tech NUS, Inc. has prepared sections of the FSAR and ER for several Early Site Permit (ESP) and COLAs, including the North Anna and Vogtle ESP applications, and the V.C. Summer and Calvert Cliffs COLAs. In addition, Tetra Tech NUS has prepared ERs for license renewal applications for more than 30 nuclear plants.

##### 1.4.4.4.4.2 ~~1.4.4.2~~ MACTEC Engineering and Consulting, Inc.

MACTEC Engineering and Consulting, Inc. (MACTEC) performed geotechnical field investigations and laboratory testing in support of FSAR Section 2.5, Geology, Seismology, and Geotechnical Engineering. That effort included performing standard penetration tests; obtaining core samples and rock cores; performing cone penetrometer tests, cross-hole seismic tests, and laboratory tests of soil and rock samples; installing ground water observation wells; and preparing a data report.

MACTEC has implemented subsurface site geotechnical investigations for several projects. These include the Vogtle and North Anna ESP applications, and the V.C. Summer, North Anna, and Vogtle COLAs. MACTEC is also involved with other ESP applications and COLAs presently being developed.

##### 1.4.4.4.4.3 ~~1.4.4.3~~ William Lettis & Associates, Inc.

William Lettis & Associates, Inc. (WLA) performed geologic mapping and the characterization of seismic sources in support of FSAR Section 2.5, including literature review, geologic field reconnaissance, review and evaluation of existing seismic source characterization models, identification and characterization of any new or different sources, and preparation of the related FSAR sections.

WLA has implemented geologic reconnaissance investigations and research to support ESP applications and COLAs for several projects. These include the Vogtle and North Anna ESP applications, and the Calvert Cliffs and V.C. Summer COLAs.

WLA is also involved with other ESP applications and COLAs presently being developed.

#### 1.4.4.4.4 ~~1.4.4.4~~ Risk Engineering, Inc. |

Risk Engineering, Inc. (REI) performed probabilistic seismic hazard assessments and related sensitivity analyses in support of FSAR Section 2.5. These assignments included sensitivity analyses of seismic source parameters and updated ground motion attenuation relationships, development of updated safe shutdown earthquake ground motion values, and preparation of the related FSAR sections.

REI has performed probabilistic seismic hazard analyses to support ESP applications and COLAs for several projects. These include the Vogtle and North Anna ESP applications, and the Calvert Cliffs, V.C. Summer, and North Anna COLAs. REI is also involved with other ESP applications and COLAs presently being developed.

#### 1.4.4.4.5 ~~1.4.4.5~~ Bechtel Corporation |

Bechtel supports project licensing primarily with regard to the ER and site characterization. Bechtel, headquartered in San Francisco, is the nation's largest power contractor. Bechtel has a history of supporting the nuclear power industry, beginning with the construction in 1950 of the EBR-1 reactor. Since then, Bechtel has engineered and constructed more than 60,000 MWe of nuclear power capacity worldwide. Currently, Bechtel has 40,000 employees and has completed 22,000 projects in 140 different countries around the globe.
