Ms. Horn:

For us, the credit history evaluation and character/reputation determination are the points that we disagree with. We believe with the FBI fingerprinting and background checks along with work history should show if a person is a threat to the security of our radiation source. The way people handle their money is of no real value at all to this situation. Also how could we determine any more about their character and reputation than through their work history? Again, we think this is going too far for no value. Would we be given any specific guidelines from NRC to go by? We don't really have that now. It is up to the TRO to determine what we will allow now.

Thank you.
