LEVY NUCLEAR PLANT, UNITS 1 AND 2

DOCKET NOS. 52-029 AND 52-030

Review of Vogtle Request for Additional Information Response for Applicability to Shearon Harris Nuclear Power Plant Units 2 and 3 and Levy Nuclear Plant Units 1 and 2

Reference: Letter from Southern Nuclear Operating Company to U.S. Nuclear Regulatory Commission dated September 3, 2010, "Vogtle Electric Generating Plant Units 3 and 4 Combined License Application Request for Additional Information Letter No. 061", ND-10-1721

Ladies and Gentlemen:

Progress Energy, Inc. has reviewed the standard response to the Request for Additional Information Letter No. 061 (see referenced letter) for applicability to the proposed Shearon Harris Nuclear Power Plant Units 2 and 3 (HAR) and the Levy Nuclear Plant Units 1 and 2 (LNP). Although the referenced letter states "This response is expected to be STANDARD for the S-COLAs," our review has determined that COLA revision #3 is not applicable to HAR and LNP.

The response to Vogtle RAI 06.04-05 includes four associated COLA revisions. Revision #3 states that Part B of Table 6.4-201 will be revised to change the Habitability Impact Evaluation for the chemicals Methoxypropylamine and Ammonium Bisulfite. These site-specific chemicals are not currently identified in the HAR or LNP COLAs. Therefore, this portion of the standard response to RAI 06.04-05 (COLA Revision #3) is not applicable to HAR and LNP.

If you have any questions, or need additional information, please contact Bob Kitchen at (919) 546-6992, or me at (727) 820-4481.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on October 8, 2010.

Sincerely,

John Elnitsky
Vice President
