

November 15, 2010

Mr. Bart Bush
Regional Commissioner
Public Buildings Service
General Services Administration
301 7th Street, SW
Washington, DC 20407

Dear Mr. Bush:

I am writing in response to your June 23, 2010, letter requesting assistance in establishing an Energy Curtailment Plan at the U.S. Nuclear Regulatory Commission (NRC) headquarters facilities and coordinating our energy curtailment efforts with the General Services Administration (GSA).

We support GSA's efforts to reduce electrical usage in Federal facilities during high demand periods in order to ensure favorable utility rates and avoid rolling black-outs or total loss of power in Federal facilities. We will coordinate our energy curtailment efforts with your staff to the extent that it will not impact the agency's mission or critical operations. In accordance with the GSA guidelines, energy curtailment criteria have been established for the NRC headquarters facilities at the One White Flint North and Two White Flint North Buildings in Rockville, Maryland.

Enclosed please find a copy of the NRC headquarters facilities, "Electricity Use Curtailment Plan." If your staff has any questions, they may contact Mr. Bahman Rowhani, Chief, Facilities Management Branch, at (301) 415-6467.

Sincerely,

/RA/ SStewart-Clark for

Kathryn O. Greene, Director
Office of Administration

Enclosure:
As stated
