Subject: ERRATA FOR FORT CALHOUN STATION NRC INSPECTION  
REPORT 05000285/2010008

Dear Mr. Bannister:

This Errata corrects the report number listed in the subject line of our original final determination letter (ML102800342). The subject line erroneously identified the inspection report as 05000285/2010007 instead of 05000285/2010008. Please replace the cover page with the enclosed revised page. We regret any inconvenience this may have caused.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, and its enclosure, will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Should you have any questions concerning this inspection, we will be pleased to discuss them.

Sincerely,

/RA/

Thomas R. Farnholtz  
Chief, Engineering Branch 1  
Division of Reactor Safety

SUBJECT: FINAL SIGNIFICANCE DETERMINATION FOR A YELLOW FINDING AND  
NOTICE OF VIOLATION, NRC INSPECTION REPORT 05000285/2010008,  
FORT CALHOUN STATION

Dear Mr. Bannister:

The purpose of this letter is to provide you the final significance determination of the preliminary Yellow finding identified in our previous communication dated July 15, 2010, which included Inspection Report 05000285/2010007. The inspection finding was assessed using the Significance Determination Process and was preliminarily characterized as a Yellow finding with substantial importance to safety that may result in additional NRC inspection and potentially other NRC action. This Yellow finding involved the failure to maintain procedures for combating a significant flood as required by Technical Specification 5.8.1.a, "Procedures."

At your request, a regulatory conference was held on August 18, 2010, to further discuss your views on this issue. During the regulatory conference, your staff described your assessment of the significance of the finding, detailed corrective actions, and the root-cause analysis of the finding. Additionally, you requested that the NRC reconsider its evaluation of the finding's risk significance based on six specific arguments. By letter dated September 23, 2010, you also provided supplemental information, clarifying information provided during the conference.

We have reviewed your arguments and our evaluation of each is provided in Enclosure 2 of this letter. After considering the information developed during the inspection, and the information that you provided at the conference, the NRC has concluded that the finding is appropriately characterized as Yellow, a finding with substantial importance to safety that will result in additional NRC inspection and potentially other NRC action.

You have 30 calendar days from the date of this letter to appeal the staff's determination of significance for the identified Yellow finding. Such appeals will be considered to have merit only if they meet the criteria given in NRC Inspection Manual Chapter 0609, Attachment 2.
