Attachments: Differences Review to licensee.docx; Watts Bar Operator Training and Certification Program and Request for Review.pdf

As discussed. Please place into ADAMS as a package and place it for immediate public release. I never put the incoming letter in ADAMS so maybe as a package it would be ok. Let me know if there are any problems and when it is done. Thanks for the help.

Subject: NRC review of WB U2 differences trng program

Rod;

Attached is a review that RII has conducted on the WB U2 differences training package submitted. We have a number of observations, comments, and a request to clarify some items. The biggest challenge we see to the program is the ability to teach applicants fully on some of the system modifications without having the feedback of a simulator. However, it may be doable and we will look for your feedback. I have not sent you how I plan to inspect, test applicants, etc., for some of the areas of concern. We will finish those discussions internally and I will provide you my plan shortly.

Questions, let me know.

Regards,
Malcolm.
