RAI 2.3.3.6-2 and 2.3.3.18-2

By letters dated August 17 and September 7, 2010, the applicant responded to requests for additional information (RAIs) 2.3.3.6-2 and 2.3.3.18-2, and provided a description of how seismic endpoints were established at various panels. The staff was unclear how the applicant designated the endpoints as base-mounted equipment.

Discussion:

Pacific Gas and Electric Company (PG&E) agreed to supplement its responses to RAIs 2.3.3.6-2 and 2.3.3.18-2 to address how endpoints at base-mounted equipment were established.

RAI 2.3.3.7-3

By letter dated September 7, 2010, the applicant responded to RAI 2.3.3.7-3, and provided a description of the water traps, and indicated that there are no oil filters located in the turbine building. However, the staff was unclear about why there is a component indicated as an oil filter on license renewal boundary drawing LR-DCPP-25-106725-50. The staff was also unclear if a failure of the described water traps could affect safety-related equipment.

Discussion:

PG&E agreed to supplement its response to RAI 2.3.3.7-3 to clarify why there is an oil filter on the above license renewal boundary drawing and provide clarification on whether failure of the water traps described above could affect safety-related equipment.
