

OCT 1 4 2010

Mr. Elmo E. Collins Regional Administrator U.S. NRC Region IV 612 East Lamar Blvd., Suite 400 Arlington, Texas 76011-4125

Dear Mr. Collins:

Enclosed is a copy of the final report for the September 14-15, 2010 medical services drill of the offsite radiological emergency response plans, site-specific to the Fort Calhoun Nuclear Station. The participants in this drill were the Nebraska Emergency Management Agency, Washington County, and the town of Blair in Nebraska; the Iowa Homeland Security & Emergency Management Division, Harrison County, and the town of Missouri Valley in Iowa. The report was prepared by Federal Emergency Management Agency Region VII staff. The final report will be provided to the states of Nebraska and Iowa.

Based on the results of the drill evaluation, the offsite radiological response plans and preparedness for the states of Nebraska and Iowa, and the affected local jurisdictions site-specific to the Fort Calhoun Nuclear Station can be implemented and are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350 approval of the offsite radiological emergency response plans and preparedness for the states of Nebraska and Iowa, site-specific to the Fort Calhoun Nuclear Station, granted on July 22, 1981, will remain in effect.

There were no deficiencies or areas requiring corrective action (ARCA's) identified. There were no ARCAs or deficiencies from previous exercises to be addressed in this drill.

If you have any questions or concerns regarding the report, please contact Mr. Ronald L. McCabe, Regional Assistance Committee Chair, at 816-283-7007 or by email ron.mccabe@dhs.gov.

Sincerely,

Beth Freeman

Regional Administrator
