Vice Minister LI Ganjie, Administrator
National Nuclear Safety Administration
Ministry of Environmental Protection
No. 115, Xizhimen Nanxiaojie
Beijing, 100035
People's Republic of China

Dear Vice Minister LI:

I very much appreciate our working relationship and our most recent cooperation on the AP1000 project. China's Ministry of Environmental Protection's (MEP) National Nuclear Safety Administration (NNSA) and the U.S. Nuclear Regulatory Commission (NRC), over the past two years, have reached many milestones in our cooperation, including the NRC-led training programs, providing to NNSA the review documents on the certification of the design for the AP1000, our recent support for the NNSA at the groundbreaking ceremony at Sanmen, and current efforts to possibly house NNSA employees at the NRC. I see this as an excellent start to a mutually beneficial relationship.

Ex. 4

I look forward to working out the arrangements that would further our cooperation in this area and mutually benefit both of our safety programs.

Sincerely,

/RA/

Dale E. Klein
