**Subject:** Buried AFW Pipe Schedule

Please know that I would NOT place great confidence on the attached schedule. The OCC was directed to prepare this schedule but went out of their way to warn me that it is not tied into the outage schedule yet.

Information tonight was sketchy because the primary decision makers were not available. However, my best understanding is:

- No decision has been made and the alternatives still include everything including:
  - do nothing if Design Engineering can show structural integrity for some interim period of time;
  - replace/repair only sections of pipe for now;
  - replace the entire length of pipe:
    - the entire outside portion or
    - the entire outside and inside portion
- Excavation should be complete by morning - it was nearly done when I looked ~19:--
