**Subject:** Chinese visit today

Got some intel from John Tappert. Apparently it is a large group, but the English speaking capabilities of all the attendees is in doubt. There is no interpreter, but the head-guy seems pretty fluent in English, and asks most of the questions.

For our topics, I think all we can do is to try to talk slowly and clearly. Steve, if I remember right, they had some source-term questions, but RSAC is not available. I expect that you could answer most questions that they would have on this. So if you are able, please support these topics. I don't think we need to have any preambles on how this is not our area for review, this would likely just confuse them, and would add no value

Don't know that we will have a lot of opportunities for questions of our own, but if so, we should discuss how they are handling LLW and 20.1406
