Steve,

I am responding to your letter, dated June 22, 2010 (ADAMS Accession No. ML101800341), in which United States Enrichment Corporation (USEC) transmitted its certificate amendment request (CAR) supporting its proposed revisions to Technical Safety Requirements (TSR) 2.4.3.4, R-114 Coolant Overpressure Control System, Required Action Revision.

As part of the screening process, the NRC staff has completed the review of the information that USEC provided on June 22, 2010, and found the information acceptable for detailed review. The staff efforts associated with this review will be charged to Technical Assignment Control (TAC) number L32754. Please reference this TAC number in all correspondence related to this action.

Based on our preliminary review and projection of current review schedules, we anticipate completing our review of your request by March 2011. This date could change depending on the findings of our technical/administrative review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule.
