Subject: Progress Energy Levy Nuclear Plant LWA

Mr. Bruner,

I live in Citrus County, the site of Progress Energy's Crystal River Nuclear Complex. I am also an unemployed citizen of Citrus County and a Florida Master Naturalist. I know two things from first-hand experience: 1. We need jobs! Issuing an LWA for the Levy plant will go a long way toward employing our citizens – not me, probably, but local construction workers who have homes and children to feed. 2. Progress Energy is not only a good job creator, but also a highly conscientious environmental steward, employing dedicated biologists who have demonstrable success in ecological remediation, fisheries replenishment, and humane avian deterrence-to mention only a few.

The Crystal River Plant was initiated some 30 years ago. At that time, the only way an environmentalist could get anyone's attention was to chain themselves to trees! In the intervening years the process has been condensed to 'No Development.' Environmental science has come a long way since then, and saying 'no' is neither reasonable nor necessary. I urge you to issue an LWA as soon as Progress Energy requires it. Environmental impacts will be closely monitored, I dare say, but I also have confidence in the willingness of Progress Energy to address them.

Thank You.
Beverly Overa
