**Subject:** FW: Issuance of license

All:

Please note that the license issued to IML does not authorize the use of "sealed sources" in license conditions 7.A through 7.EE. according to IML's response letter dated October 26, 2010. Before IML acquires "sealed sources" in the future, the license needs to be amended to authorize the use of sealed sources (provide radionuclide, activity per source, total activity, source manufacturer's name and model number). I have added standard conditions 13 and 14 to the license that govern "sealed sources" in the event that sealed sources are added in the future to this license. There is no cost associated with submitting a license amendment request.

Applicant stated that <sup>in the license application</sup> in the event that they acquire sealed sources that they will leak test them. Therefore reviewer added License conditions 13 & 14 and warned the now licensee that an amendment will be needed to authorize sealed sources.

**Subject:** Issuance of license  
**Attachments:** License.pdf; Transmittal letter.pdf

Attached is pdf copy of the license that was issued on 10/27/2010. The original document will arrive in the mail within a few days. If you need to amend the license in the future please keep in mind that we process amendments within 90 days. Please note that this license expires 10 years from now. A license renewal application needs to be submitted before the license expires.
