Guam - Piti and Tanguisson Counties are designated nonattainment for the SO₂ NAAQS

* The National Ambient Air Quality Standards are health standards for lead, carbon monoxide, sulfur dioxide, ground level 8-hr ozone, and particulate matter (PM-10 and PM_{2.5}). They also include nitrogen dioxide nonattainment areas.

** Partial counties, those with part of the county designated nonattainment and part attainment are shown as full counties on the map.

The following multi-state nonattainment areas have some states in the area that have been redesignated, but are not considered maintenance areas until all states in the area are redesignated. The counties for these areas are displayed as nonattainment areas: Chicago-Gary-Lake Michigan 8-hr Ozone area and the Cincinnati-Hamilton, OH-KY-IN 8-hr Ozone area.
