OCT 26 2010

John E. Freitas, M.D.
Radiation Safety Officer
Department of Radiology
Emma L. Bixby Medical Center
818 Riverside Avenue
Adrian, MI 49221

Dear Dr. Freitas:

Enclosed is Amendment No. 49 to your NRC Material License No. 21-03194-01 in accordance with your request. Please note that the changes made to your license are printed in **bold** font. **Also note that Subitem 8.D. was modified from "as needed" to a total possession limit of 10 millicuries. This change was made in accordance with current licensing policy. If you require more than 10 millicuries, please contact us as soon as possible.**

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Toye L. Simmons
Materials Licensing Branch
