Thank you! I got your message, too. I appreciate you making the phone call and it is definitely good that we know no sites will be impacted. Since the SEIS didn't say that specifically, I was hesitant to include it in letters, but it seems like we are okay to do that at this point.

Hey Bree,

I spoke again with Nathan Flemming late yesterday. No sites will be impacted by the proposed action. We just need to make sure a management (protection) plan is developed by the applicant and roll it into the MOA. The bulk of the MOA will deal with the Pumpkin Buttes. Also, I asked him what information was the most up to date. He stated the TRC Class 1 report has the most accurate accounting of the situation (NRHP info).

I'll fix these letters and put them back into typing. I have to meet with Behram and Kevin this morning, so I want to take care of this first.

Jenny
