**Reference: License #08-30577-01 Request**

Dear Sir/Madam:

03035409

The Medstar Georgetown Medical Center, Inc. (MGMC) submitted a license renewal package in May 2010. Since then, our RSO resigned from MGMC and a new RSO, Dr. Maxwell Amurao, was retained, to manage the Radiation Safety Program.

MGMC respectfully requests an extension to the license renewal process and establishing a new deadline for submission of May 31, 2011. This additional time will allow Dr. Amurao to review the license commitments and verify the license renewal package, adequately reflects the practices and procedures within the facility. This additional time also allows Dr. Amurao to remodel the program to reflect his vision for the Radiation Safety Program at MGMC.

Please advise of any questions or concerns by dialing 202-444-2903.

Your consideration of this matter is greatly appreciated.

Sincerely,

Emma F. Hooks  
Executive Administration Representative to the Radiation Safety Committee  
Assistant Vice-President  
Safety Management & Environmental Quality
