**Subject: NSF International Application for Materials License**

Dear Mr. Mullauer,

This letter is in reference to our phone conversation today regarding NSF International's application. In order to bring the quantity of materials below the limit requiring financial assurance, NSF International hereby requests to make the following amendment to the Application for Materials License dated August 20, 2010:

**Item 5: Radioactive Material**

**Reduce the maximum amount of Radium-226 requested from 5 microcuries to 4 microcuries.**

The remaining information in Item 5 remains unchanged.

Please do not hesitate to contact me if any further information is required.

Sincerely,

A handwritten signature in black ink that reads 'Robert C. Robke'.
