General Comment

C. Specific Request for Comment

Q. (1) Is the source material defined as being controlled by a licensee (i.e. material that is controlled under a state or federal materials license) or any material which may contain >0.05% uranium (not under the control of licensees; such as outcrops, mine workings, core required to ascertain if material is minable, etc.)? How is a uranium exploration, development or associated contractors such as analytical facilities to determine this concentration in advance of testing? Does this mean that a driller contractor identifying uranium ore deposits would need an NRC SML to distribute samples for analytical characterization (i.e. testing)?

Van,

Attached for docketing is a comment letter on the above noted proposed rule (75 FR 43425) from Sheryl Garling that I received via the regulations.gov website on 11/20/10.

Thanks,
Carol
