Hello Dan,

We have no objections for you to post the attached file to ADAMS.

BTW, what is the status of the remaining SAMA RAIs. When will you be sending them formally to us.

Regards,
Abbas

p.s. Happy Thanksgiving

Abbas,

I would like to add the attached letter to ADAMS as an NRC record and release it to the public. The letter is from Dr. Robert Whitlam of the Washington Department of Archaeology & Historic Preservation to Mr. Doug Coleman, Energy Northwest, regarding the area of potential effect for the Columbia Generating Station license renewal review. The letter is dated July 29, 2010. Please let me know if you agree with this action.

Thanks,

Dan Doyle

Re: Columbia Generating Station License
Log No.: 121007-20-NRC

Dear Mr. Coleman;

Thank you for contacting our department. We have reviewed the materials you provided for the proposed revised Area of Potential Effect (APE) for the Columbia Generating Station License Renewal at the Hanford Site, Benton County, Washington.

We concur with your proposed revised Area of Potential Effect (APE) as described in the accompanying text as excluding the Transmission Lines Routing because BPA controls the Line.

We would also appreciate receiving any correspondence or comments from concerned tribes or other parties that you receive as you consult under the requirements of 36CFR800.4(a)(4).

These comments are based on the information available at the time of this review and on behalf of the State Historic Preservation Officer in compliance with the Section 106 of the National Historic Preservation Act, as amended, and its implementing regulations 36CFR800.4.

Should additional information become available, our assessment may be revised, including information regarding historic properties that have not yet been identified. Thank you for the opportunity to comment and we look forward to receiving the requested materials and further consultation.

Sincerely,

Robert G. Whitlam, Ph.D.
State Archaeologist
