Chunlin:

This call is about the in-plane shear test proposed by Westinghouse, and I need to tell them our review results on the proposed test during this Friday phone call with them. There are only two machines (test equipment): one at the University of Toronto, and the other at University of Houston, in the world can properly perform the test, and we have problems in the Westinghouse proposed test model and set-up. I want talk with these experts before I make a decision on what to tell Westinghouse this Friday. I'll conduct the call remotely by calling in from my home. If you are interested in the discussion, please talk to Bret and he will tell you where NRC staff members will go for this phone call.

John,

No problem. I will be on the call if you need anything.

Bret

YL,

Thank you. Bret Tegeler from the NRC will send an email with the conference call number. He may only send it tomorrow morning.

Thanks again,

Jose.
