General Comment

Hello,

I think that it is a good idea to re-open this docket and clarify the difference between construction" and "commencement of construction" especially when it comes to the use of nuclear materials. I believe that companies need to know when they are actually conduct or about to conduct its designated job or task. This should also help with understanding when and how they are suppose to go about disposing of these materials that are produced during construction or daily operations. I also hope that all companies understand by the time they commence or start construction they should have a plan in place to properly dispose of the raw materials that are created and not try to figure it out as they go. Because in the end that will only lead to bad housekeeping practices. Furthermore if companies are found to be non-compliant is the disposal of raw materials that they are punished to the fullest extent possible.

Attachments: NRC-2010-0075-DRAFT-0016.pdf

Van,

Attached for docketing is a comment on the above noted proposed rule (3150-AI79) that I received via the regulations.gov website on 11/25/10.

Thanks,
Carol
