Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
FPL Comments for the 2010 Written NRC License Examination

The provisions of NUREG-1021, Operator Licensing Examiner Standards, Examiner Standards ES-402, Administering Initial Written Examinations, allow the opportunity for submittal of comments on the written portion of the License Examination to the NRC. This letter documents that Florida Power and Light (FPL) Company has no challenges related to the site-specific written examination administered at Turkey Point on November 10, 2010.

FPL has one comment regarding the 2010 NRC License Examination answer key. The answer key (which was previously provided to NRC) has one question response incorrectly marked. Specifically, the correct response to question 99 is "A", instead of the presently marked response "C". Question 99 was changed during the latter stages of NRC/FPL examination comments, but the answer key was not properly revised. The revised corrected answer key is attached.

Should there be any questions, please contact Gregory Laughlin at (305) 246-6274.

Sincerely,

Michael Kiley
Vice President
Turkey Point Nuclear Plant
