

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

December 13, 2010

LICENSEE: Exelon Generation Company, LLC (Exelon)

FACILITY: Peach Bottom Atomic Power Station, Units 2 and 3

SUBJECT: SUMMARY OF MARCH 18, 2010, MEETING WITH EXELON TO DISCUSS PROPRIETARY INFORMATION RELATED TO A REQUEST FOR ADDITIONAL INFORMATION ASSOCIATED WITH A LICENSE AMENDMENT REQUEST UNDER REVIEW TO REVISE THE TECHNICAL SPECIFICATIONS FOR THE SPENT FUEL POOL K-INFINITY VALUE (TAC NOS. MD9154 AND MD9155)

On March 18, 2010, a Category 1 public meeting was held between members of the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Exelon Generation Company, LLC (Exelon) at NRC Headquarters, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. The purpose of the meeting was to discuss the NRC staff's Request for Additional Information (RAI) dated March 4, 2010 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML100610290). The RAI is associated with the supplement provided by Exelon on December 18, 2009, regarding a License Amendment Request to revise the Technical Specifications related to the Spent Fuel Pool K-infinity value for Peach Bottom Atomic Power Station, Units 2 and 3 (ADAMS Accession No. ML093521435).

Proprietary information associated with the amendment request and RAI were discussed during the closed portion of the meeting. The meeting concluded with an open portion for public questions and comment, however, no members of the public attended the meeting.

On March 26, 2010, Exelon submitted a formal response to the NRC RAI request (ADAMS Accession No. ML100910075). This letter includes non-proprietary RAI responses based in part on the discussions held during the March 18, 2009, meeting.

No regulatory decisions were made during the meeting. A list of the meeting attendees is provided in the Enclosure.
