November 23, 2010

Mr. Rusty Lundberg
Executive Secretary
Utah Radiation Control Board
195 North 1950 West
Salt Lake City, Utah 84114-4850

Subject: Follow-Up Letter for Condition Report CRSD10-050; Waste Shipment Which May Exceed Class A Limits; Generator 9077-04-0002 (Bates Number L115195); SAP # 0903005140

Mr. Lundberg,

On Thursday, November 18, 2010, EnergySolutions provided notification to the Executive Secretary of a potential incoming shipment discrepancy from generator 9077-04-0002 (Bates Number L115195). The shipment arrived at the Clive Facility on November 16, 2010. Initial data indicates that the shipment may exceed Class A limits for several radionuclides. The shipment was placed on hold and Condition Report CRSD10-050 was written. As an additional note, based on our review, there is a possibility that the SNM exemption may have been exceeded for this shipment. Accordingly, required notification was made to NRC Region IV via telephone on November 19, 2010.

At this time, the shipment remains on hold and EnergySolutions is continuing to evaluate data provided by the generator and on-site analytical. As this evaluation is not yet complete, it is unknown whether a compliance schedule will be needed. Further information will be provided to the Executive Secretary as it becomes available.

If you have any questions regarding this issue, please contact me at 801-649-2096.

Sincerely,

A handwritten signature in cursive script that reads "Curtis R. Kirk".

Curtis Kirk
Clive Facility Quality Assurance Manager
