B.8 STATEMENT OF WORK

PWR FUEL ASSEMBLY MOCKUP STATEMENT OF WORK

1.0 BACKGROUND

The Nuclear Regulatory Commission inspects the facilities of licensees to determine whether the facility operations are conducted in compliance with license provisions and to identify conditions that might adversely affect the health and safety of the public or the environment. In support of this mission, Nuclear Regulatory Commission personnel are trained in areas of nuclear power plant design, normal operation, abnormal operation, and emergencies. These areas are taught both in a classroom environment and on nuclear power plant control room simulators. Training aids are used to show a student the relative size of components, how a component works during normal operation, and potential areas of concern during abnormal events.

2.0 CONTRACT OBJECTIVE

The objective of this contract is to provide three (3) fuel assembly mockups and extra fuel assembly parts for training NRC personnel in the design of PWR fuel assemblies.

3.0 SCOPE OF WORK

The Contractor shall provide the labor and materials to construct three (3) PWR fuel assembly mockups that meet the requirements stated below. The Contractor will also supply fuel assembly parts to be used as training aids to pass around to students in a classroom setting to show some of the individual parts of the fuel assembly. The Contractor will arrange for shipping of the fuel assembly mockups as follows: one assembly and the pass around parts to the NRC's Technical Training Center in Chattanooga, Tennessee; one assembly to the NRC's Professional Development Center in Bethesda, Maryland; and one assembly to the NRC's Region II office in Atlanta, Georgia. The actual shipping addresses will be provided upon award of contract.

3.1 FUEL ASSEMBLY MOCKUP DESCRIPTION

The Contractor shall construct three (3) PWR fuel assembly mockups. The materials used to construct the mockups can be steel, aluminum, other metals, or actual fuel assembly parts that have been determined to not meet the quality standards to be used in fuel assemblies for a plant. The fuel assembly mockups should not contain any radioactive materials. The mockups should be built without a stand.

The mockups should be designed such that they meet the following requirements:

- a. The mockups should be based upon a 17 x 17 fuel array with 25 guide thimbles (24 for control rod fingers and the center instrument thimble).
- b. The length of the fuel rods in the mockups should be about four (4) feet. The overall height of the fuel assembly will be based upon this length of fuel rod.
- c. The other dimensions of the fuel assembly mockup (width and depth) should be equal to the present day fuel assemblies.
- d. The mockups should have some fuel rod positions filled with steel rods to simulate fuel rods and at least parts of two sides open so that a student can view the internal structure of the skeleton of the assembly. An example of this would be to fill in two or three rows of simulated fuel rods on opposite sides of the assembly and leave all of the other fuel rod spaces open.
- e. The guide thimbles should include the dashpot at the bottom to show the students how the controls rods are slowed on a reactor trip.
- f. The top and bottom spacer grids should be designed as on the present day fuel assemblies. The remaining spacer grids should be typical of what can be found on a full-sized fuel assembly, but less in number (intermediate and flow mixing grids).
- g. The top nozzle of the mockups should be of the removable top nozzle design that is used in present plants.
- h. The bottom nozzle of the mockups should be of the debris resistant design that is used in present plants.
- i. Each fuel assembly mockup should contain a control rod mockup which consists of the 24 rodlets attached to the spider hub, and inserted into the guide thimbles.

3.2 PARTS TO PASS AROUND IN CLASS

Some of the parts of a fuel rod/fuel assembly (mockup or actual parts that are not qualified to be used in a plant fuel assembly) should be available for students to view in class. These parts should not be radioactive or contaminated. The following lists the parts that would be provided to be passed around in class. Other fuel assembly/fuel rod parts as recommended by the Contractor may also be included in the offer.

- Fuel rod plenum spring (1)
- Fuel rod top plug (1)
- Fuel rod bottom plug (1)
- Guide tube bottom plug (1)
- Screw that holds bottom nozzle to guide tube bottom plug (1)
- Fuel assembly removable top nozzle with springs (1)

Fuel assembly bottom nozzle (1)
Fuel assembly spring clip grid assembly, complete (1)
Control rod spider hub (1)

4.0 LEVEL OF EFFORT

The level of effort required will be the materials necessary to build the mockups and provide the parts for passing around in class, the labor necessary to put the mockups together, and the effort to package and ship the mockups to the three locations.

5.0 MEETINGS AND TRAVEL

None.

6.0 NRC FURNISHED MATERIAL

None.

7.0 SUBCONTRACTS

No subcontracts are anticipated for this contract. However, any subcontract would require prior written permission of the NRC Contracting Officer.

(JUN 2010)**

(a) Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. The Government must exercise its post-acceptance rights-

(1) Within a reasonable time after the defect was discovered or should have been discovered; and

(2) Before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

The Contractor shall proceed diligently with performance of this contract, pending final resolution of any dispute arising under the contract.

(e) Definitions. The clause at FAR 52.202-1, Definitions, is incorporated herein by reference.

(f) Excusable delays. - (vi) Terms of any discount for prompt payment offered;
- (vii) Name and address of official to whom payment is to be sent;
- (viii) Name, title, and phone number of person to notify in event of defective invoice; and
- (ix) Taxpayer Identification Number (TIN). The Contractor shall include its TIN on the invoice only if required elsewhere in this contract.
- (x) Electronic funds transfer (EFT) banking information.

(A) The Contractor shall include EFT banking information on the invoice only if required elsewhere in this contract.

(B) If EFT banking information is not required to be on the invoice, in order for the invoice to be a proper invoice, the Contractor shall have submitted correct EFT banking information in accordance with the applicable solicitation provision, contract clause (e.g., 52.232-33, Payment by Electronic Funds Transfer-- Central Contractor Registration, or 52.232-34, Payment by Electronic Funds Transfer--Other Than Central Contractor Registration), or applicable agency procedures.

(C) EFT banking information is not required if the Government waived the requirement to pay by EFT.

(2) Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) prompt payment regulations at 5 CFR part 1315.

(h) Patent indemnity. The Contractor shall indemnify the Government and its officers, employees and agents against liability, including costs, for actual or alleged direct or contributory infringement of, or inducement to infringe, any United States or foreign patent, trademark or copyright, arising out of the performance of this contract, provided the Contractor is reasonably notified of such claims and proceedings.

(4) Discount. In connection with any discount offered for early payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the specified payment date if an electronic funds transfer payment is made.

(5) Overpayments. If the Contractor becomes aware of a duplicate contract financing or invoice payment or that the Government has otherwise overpaid on a contract financing or invoice payment, the Contractor shall--

(A) Circumstances of the overpayment (e.g., duplicate payment, erroneous payment, liquidation errors, date(s) of overpayment);

(B) Affected contract number and delivery order number, if applicable;

(C) Affected contract line item or subline item, if applicable; and

(D) Contractor point of contact.

(ii) Provide a copy of the remittance and supporting documentation to the Contracting Officer.

(6) Interest.

(i) All amounts that become payable by the Contractor to the Government under this contract shall bear simple interest from the date due until paid unless paid within 30 days of becoming due. The interest rate shall be the interest rate established by the Secretary of the Treasury as provided in Section 611 of the Contract Disputes Act of 1978 (Public Law 95-563), which is applicable to the period in which the amount becomes due, as provided in (i)(6)(v) of this clause, and then at the rate applicable for each six-month period as fixed by the Secretary until the amount is paid.

(ii) The Government may issue a demand for payment to the Contractor upon finding a debt is due under the contract.

(iii) Final decisions. The Contracting Officer will issue a final decision as required by 33.211 if--

(A) The Contracting Officer and the Contractor are unable to reach agreement on the existence or amount of a debt within 30 days;

(B) The Contractor fails to liquidate a debt previously demanded by the Contracting Officer within the timeline specified in the demand for payment unless the amounts were not repaid because the Contractor has requested an installment payment agreement; or

(C) The Contractor requests a deferment of collection on a debt previously demanded by the Contracting Officer (see 32.607-2).

(iv) If a demand for payment was previously issued for the debt, the demand for payment included in the final decision shall identify the same due date as the original demand for payment.

(v) Amounts shall be due at the earliest of the following dates:

(A) The date fixed under this contract.

(B) The date of the first written demand for payment, including any demand for payment resulting from a default termination.

(vi) The interest charge shall be computed for the actual number of calendar days involved beginning on the due date and ending on--

(A) The date on which the designated office receives payment from the Contractor;

(B) The date of issuance of a Government check to the Contractor from which an amount otherwise payable has been withheld as a credit against the contract debt; or

(C) The date on which an amount withheld and applied to the contract debt would otherwise have become payable to the Contractor.

(vii) The interest charge made under this clause may be reduced under the procedures prescribed in 32.608-2 of the Federal Acquisition Regulation in effect on the date of this contract.

(j) Risk of loss. Unless the contract specifically provides otherwise, risk of loss or damage to the supplies provided under this contract shall remain with the Contractor until, and shall pass to the Government upon:

To remain registered in the CCR database after the initial registration, the Contractor is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the CCR database to ensure it is current, accurate and complete.
