Document\_Title: Environmental Impact Statement for Combined Licenses (COLs) for Comanche Peak Nuclear Power Plant Units 3 and 4.

Comments: Last year (2009) Lake Granbury was a 25 year lake level low. This is before any new use from Comanche Peak Nuclear units 3 & 4. The lake and the thousand who rely on its water will be in dire straights if these units are approved and go online when a drought hits again. Who will provide water for these people then? What about their property values? This was a mild drought. When a prolonged, severe drought hits (and it will) what will these people do? What will the plant do for water then? These new units are going to prove disastrous for the tax paying citizens that rely on water from Lake Granbury.
