Dear Mr. Skowronek:

Enclosed is Amendment No. 32 amending NRC Material License No. 21-05199-02 in accordance with your letter dated September 8, 2010 and subsequent letter dated November 10, 2010. Please note that the changes made to your license are printed in **bold** font.

This amendment approves the release of your facility located on 815 Terminal Road in Lansing, MI for unrestricted use. Based on review of the information provided in your request, we have concluded that any residual byproduct material remaining in the facility is below the NRC's unrestricted use dose limits specified in 10 CFR Part 20, subpart E "Radiological Criteria for License Termination."

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii).

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>. A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,
