Name of Licensee: Arraiza Radiology PSC
D/b/a Arecibo Radiology Imaging Center**Name of Participant(s):** Dr. Eduardo Pascual Ferrer**Telephone No.** (787) 878-3000 ext. 221**Subject:** Additional information for amendment request
(NOTE: This will be used as the Documents Title in ADAMS)

The request was for removal of an authorized user (AU) from the license. A review of the license docket files identified some additional issues. NRC staff contacted the licensee to discuss and confirm the following information:

During a review of the license, it was noted that 35.300 use was limited to I-131 beginning in Amendment No. 12. It was unclear if the licensee requested this change. I called to ask if the restriction was acceptable. Dr. Pascual responded that they have been and are currently only using I-131 for diagnostic and therapeutic uses.

I informed Dr. Pascual that because this is an outpatient facility, Item 9C on the license will be updated to read: "Any iodine-131 study or procedure permitted by 10 CFR 35.300, for which the patient can be released under the provisions of 10 CFR 35.75." Dr. Pascual confirmed that he understood that this item should be listed on their license.

Action Required: Issue amendment**Document Availability:**
