Subject: Additional information regarding training program for proposed authorized user

This record is to document messages left by voicemail and e-mail on the date listed above.

Following a discussion with Jim Luehman, Chris Einberg, and Mike Fuller of FSME, I contacted Mr. Norweck and Ms. Godby to request the following:

- 1) Provide a description of the way in which the Institute for Nuclear Medical Education ensures that (a) the student is present for all 80 hours of classroom training, and (b) the student completes a full 20 hours of self-study.
- 2) To complete the response to my previous request, provide a class schedule showing the hours during which classroom and laboratory training was conducted and which topics were taught at which times.

I also noted that, while the regulation requires only 80 hours of classroom and laboratory training, it is necessary to consider the 20 hours of self-study because Dr. Mallah's preceptor documented 600 hours of supervised work experience. Documentation of a total of 700 hours of training is required. Another option could be to document an additional 20 hours of work experience.

Action Required: Await receipt of requested information, then review with FSME.
