December 8, 2010

Mr. David J. Precht
Acting Manager, Columbia Plant
Westinghouse Electric Company
Commercial Nuclear Fuel Division
Drawer R
Columbia, SC 29250

SUBJECT: ADJUSTMENT OF LICENSEE PERFORMANCE REVIEW PERIOD

Dear Mr. Precht:

The NRC's Licensee Performance Review (LPR) process as described in Manual Chapter 2604, states that a performance review shall be conducted for each active fuel cycle facility every 12 to 24 months. As currently scheduled, each facility has its own unique review period that is based upon the end date of the previous review period and the length of the current review period that was established based on the results of the previous LPR. After review of this current scheduling process, and with the intent of increasing efficiency and improving consistency in the process, the NRC has adjusted the LPR review period for each fuel facility so that each review period will end on December 31. For those fuel facilities that have LPR periods ending in the same calendar year, the NRC will implement the LPR process beginning in January of the following year with the intent of completing all public LPR meetings between mid-March and the end of April of that year.

As presently scheduled, Westinghouse's current LPR review period is from February 14, 2009 to August 20, 2010, an 18 month period established based on the results of the previous LPR. In order to align the Westinghouse LPR period with a December 31 end date, the NRC has adjusted the Westinghouse LPR period to February 14, 2009 to December 31, 2010, a period of approximately 22 months. As a result, the next public LPR meeting to discuss Westinghouse's performance would occur in the mid-March to April time period in 2011. The following LPR period would be from **January 1, 2011 to December 31, 2012**, unless the review period is reduced based on the results of the current LPR. We apologize for any confusion we may have caused with our letter dated December 8, 2010.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document

system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA by M. Sykes/

Marvin D. Sykes, Chief
Fuel Facility Inspection Branch 3
Division of Fuel Facility Inspection
