NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20545

November 29, 1964

Interstate Nuclear Services Corp.
North 3rd Avenue
Royersford, PA 19468

Gentlemen:

The U. S. Nuclear Regulatory Commission has specified, in Sections 75.31, 75.34, 70.54, and 40.64 of 10 CFR Parts 75, 70 and 40, and in associated reporting instructions (enclosed) requirements for submittal to the NRC of material transfer reports whenever certain transfers of special nuclear material or source material occur. Reports are required for a transfer of 1 gram or more of contained U-233, U-235, or Pu in special nuclear material or 1 kilogram or more of uranium or thorium in source material. In addition, Sections 70.53, 40.64, and 30.55 of 10 CFR Parts 70, 40, and 30 require semiannual statements of special nuclear material and tritium inventories, and annual statements of source material inventories from licensees authorized to possess more than 350 grams of contained special nuclear material, more than 10,000 curies of tritium, or more than 1,000 kilograms of source material, respectively.

The NRC utilizes an electronic data processing system to record these reports. All licensees subject to these reporting requirements have been assigned a three-letter symbol for identification. This Reporting Identification Symbol (RIS) should be used in completing the transfer forms (DOE/NRC-741) in accordance with the instructions, and should be used in inventory reports and other correspondence with the NRC relative to such reports.

The symbol YOB has been assigned as the RIS for activities under License No. 37-23341-01.

Sincerely,

Gloria M. Bennington
