RECORD #217

TITLE: Qualification of Radiation Protection Manager - Reg. Guide
1.8, Rev.2

FICHE:

AUG 24 1989

MEMORANDUM FOR: Ronald R. Bellamy, Chief, EPRPB, DRSS, Region I
Douglas M. Collins, Chief, EPRPB, DRSS, Region II
L. Robert Greger, Chief, RPB, DRSS, Region III
Blaine Murray, Chief, RPSB, DRSS, Region IV
Gregory P. Yuhas, EPRPB, DRSS, Region V

FROM: LeMoine J. Cunningham, Chief
Radiation Protection Branch
Division of Radiation Protection
and Emergency Preparedness
Office of Nuclear Reactor Regulation

SUBJECT: QUALIFICATION OF RADIATION PROTECTION MANAGER -
REGULATORY GUIDE 1.8, REVISION 2

Regulatory Guide 1.8, Revision 2, "Qualification and Training of Personnel for Nuclear Power Plants," includes Regulatory Position C.1.k: "The radiation protection manager should have the qualifications described in Section 4.44 of ANSI/ANS-3.1-1981 with the clarification that three of the four years experience in applied radiation protection should be professional-level experience."

ANSI/ANS-3.1-1981 includes the requirement that at least three of the four years experience in applied radiation protection "...shall be in applied radiation protection work on a nuclear facility dealing with radiological problems similar to those encountered in nuclear power plants, preferably in a nuclear power plant."

The purpose of this memorandum is to clarify that the intent of Regulatory Position C.1.k in Regulatory Guide 1.8, Revision 2, quoted above, was that the three years experience "...in applied radiation protection work in a nuclear facility..." should all be professional level experience. This is consistent with the earlier position in Revision 1 of Regulatory Guide 1.8 that "at least three years of this professional experience should be in applied radiation protection work in a nuclear facility dealing with radiological problems similar to those encountered in nuclear power stations, preferably in an actual nuclear power station." In preparing Revision 2, there was no intention to change this position in Revision 1.
