RE: SHPO Case No. 10-2511
Reed College Research Reactor Project
3203 SE Woodstock Blvd, Portland, Multnomah

Dear Mr. Parker:

We have reviewed the materials submitted on the project referenced above, and we concur with a finding of No Historic Properties Affected for this undertaking. We do consider it to be eligible for listing because it would meet Criterion Consideration G of the National Register based on exceptional significance as one of only 27 research reactors in the United States, and as the only liberal arts college in the world with a nuclear reactor. Relicensing of the research reactor to allow operations to continue is considered a positive effect by retaining its use.

Our response here is to assist you with your responsibilities under Section 106 of the National Historic Preservation Act (per 36 CFR Part 800). Please feel free to contact me if you have further questions, comments or need additional assistance.

Sincerely,

Julie Osborne
Preservation Specialist

Has the property been physically altered? No Alterations Few Alterations Major / Many Alterations

SECTION 2: APPLICANT DETERMINATION OF ELIGIBILITY - Check the appropriate box

The purpose of this review is to avoid impacts to properties that are "eligible" (historic) or already listed in the National Register of Historic Places. Fully establishing historic significance can be very costly and time consuming. Therefore initial evaluations are based on age (50 years or greater) and integrity (historic appearance), which are the minimum qualifications for listing in the National Register. Additional documentation may be needed further in the process, but typically initial evaluations allow the review process to proceed expeditiously.

The property is considered **Eligible** at this time because it is already listed in the National Register **or**

- is at least 50 years old **and** retains its historic integrity (minimal alterations to key features)
- has potential significance (architectural or historical)

The property is considered **Not Eligible** at this time because it:

- is less than 50 years old **or** is 50 years or older but there have been major alterations to key features
- is known to have no significance, based on National Register-level documentation and evaluation

SECTION 3: APPLICANT DETERMINATION OF EFFECT - Check the appropriate box

The project has **NO EFFECT** on a property that is eligible or already listed in the National Register, either because there is no eligible property involved or the eligible property will not be impacted physically or visually.

The project will have a minor impact on a property that is eligible or already listed in the National Register, and therefore there is **NO ADVERSE EFFECT**. Minor impacts include replacement of some, but not all, siding, doors, or windows, etc.

The project will have a major impact on a property that is eligible or already listed in the National Register, therefore there is an **ADVERSE EFFECT**. Major impacts include full or partial demolition, complete residing, full window replacement, etc.

SECTION 4: PREVIOUS ALTERATIONS TO THE BUILDING OR STRUCTURE

Only complete this section for buildings that are 50 years old or older. Describe any alterations that have already occurred to the building, such as material replacement, including siding, windows, and doors; any additions, including garages; and any removal or addition of architectural details, such as brackets, columns, and trim. Provide estimated dates for the work. Attach additional pages as necessary.

SECTION 5: PROJECT DESCRIPTION

Describe what work is proposed, including what materials will be used and how they will be installed. Specifically identify what historic materials will be retained, restored, replaced, or covered. Include drawings, photos, cut sheets (product descriptions), additional sheets, and other materials as necessary. For vacant lots, please describe the intended use.

This is an existing building on the Reed College campus in Portland, OR. The Research Reactor has been licensed by the NRC and operating there since 1968. The NRC is currently reviewing the license for renewal to allow operations to continue. No substantial changes are being made with regard to licensed activities and there are no significant environmental effects associated with the reactor operation.

The Reactor Building is located adjacent to the Psychology Building on campus.

Please see enclosed photos of building, current and from 1968.
