Thanks. I'll try to talk to Andrea - I think it is more important we call today given the press release is going out.

Andrea wants Bill's group involved, but I just emailed her to say I couldn't do that given I'm at home and you're at home. Maybe you can make the call tomorrow without me, is what I also told her.

You also might want to mention there will be a press release today that covers the switch to SEISs.

Christianne,

Andrea asked me to put together some talking points, which I haven't done. Sorry. I can call Shannon with the items below to discuss.

Did anyone reply to Shannon Anderson? I think we just need to give her a quick call to say

- 1) the ML number for the email featured in the industry press release is ML091530056
- 2) There was no meeting and so no minutes
- 3) The GEIS will be public tomorrow.

We wanted to coordinate, so I haven't called, but I think we should do it today before the GEIS is public. I'm not in today. I may be able to call this afternoon but if we want to be sure it would be better if someone else could do it.
