Subject: RE: Attachment D to Proposed MOU with NRC on Uranium Solution Mining

Frank - thank you for copying us on this email. We are glad to see you are making progress getting the MOU reviewed internally.

We are ready to submit the MOU to you in final form - for your signature. Do you have any concerns with us providing you the MOU in a transmittal note from our Division Director?

Patrice M. Bubar, PE, Deputy Director
Environmental Protection and Performance

Subject: Attachment D to Proposed MOU with NRC on Uranium Solution Mining

(See attached file: draft BLM-NRC MOU-7-1-09--co-lead.docx)

Marci

It was great to meet you the other day and I believed I mentioned that we might be in touch.

We need your help. We've been working on a Uranium Solution Mining MOU with the NRC for several months and believe we are about ready for signing. However Deb Agnolet suggested we run Attachment D to the MOU past Planning to make sure its complete.

The purpose of the MOU is to cooperate as much as possible on NEPA work to try to eliminate duplication as each Agency makes sure its NEPA process is satisfied and addresses its needs. We've worked closely with WYSO and the field offices currently involved.

If you all could get us any suggestions you have by next Wednesday, it would help us get this MOU wrapped up. I included the complete draft with track changes turned on so that you could understand Attachment D in context. Rick Deery or Deb Agnolet can answer questions.

Thank you.
