There is no official nrc correspondence. Just a call and a follow up email. The official correspondence will be the press release

Thanks. The correspondence we are looking for would have gone out before that. The 5/29 press release industry put out refers to "official NRC correspondence". I am trying to figure out what that is referring to.

We had a question from Shannon Anderson Powder River Basin Resource Council. Apparently one of the companies referenced a correspondence from the NRC regarding SEISs in a press release. Shannon is looking for the letter - I thought it might be your email.
