Andrea, Jim and Christianne

Attached you will find my attempt to sum up what we talked about on Thursday(Wed?) of this week. You will see that for the Purpose of the GEIS, I used most of what I read in the communication plan (that Christianne has written)for the GEIS.

As Jim was saying, for most of our comments, we either pointed the stakeholder where we already have addressed their concern in the GEIS or incorporated their comments by revising application sections of the GEIS. if the comments were site specific in nature, we stated that the sit specific review will address that.

Without knowing exactly what EPA's concerns are, it is difficult to assume which comments the EPA still feels are not adequately addressed in the GEIS. Marthea has still not responded to my email requesting clarification on their specific issues on Groundwater, surface water and air quality. She said the individual who is knowledgeable about these subjects is not available for a couple of days, so I presume, we may not know exactly what their issues are until the call on Monday afternoon. The Good think is that we have Christianne's document to refer to during the call.

let me know if I need to change, add anything to this document. Are we sending this document to EPA?

Haimanot
